Manvith Reddy Dalli

Boston, MA — +1 (617) 908-0883 — reddydalli.m@northeastern.edu — manvith-reddy-dalli-38a06a257

Education

Northeastern University — **Boston, MA**
M.S. in Information Systems; GPA: 3.520/4.0 — *Sept 2024 – Jun 2026*

B.M.S. College of Engineering — **Bengaluru, India**
B.E. in Information Science & Engineering — *Aug 2020 – Jul 2024*

Technical Skills

Languages: Python, SQL, C++, Java, VB.NET
AI/ML: LLMs, Multi-Agent AI, Transformers, Diffusion Models, GNNs, LoRA, PyTorch, TensorFlow
Data & Automation: Snowflake, ETL/ELT, UiPath, RPA, REST APIs, AWS S3, Data Validation
Tools: Streamlit, Tableau, Power BI, Git/GitHub, Docker, Hugging Face, CUDA

Experience

Citizens Bank — **Westwood, MA**
Automation Developer Co-op — *Jan 2026 – Sep 2026*

- Developed enterprise automations projected to eliminate **1,000+ hours of manual work annually** across Private Banking and CMOD operations.
- Built a Private Banking quality-control automation projected to save **700 hours annually** by automating validation and exception-review workflows.
- Developed a CMOD reject-processing automation projected to save **309 hours annually**, optimizing high-volume DataTable parsing and legacy workflow logic.
- Engineered an exception-monitoring solution to detect missing screenshot configurations and improve production troubleshooting across UiPath processes.

Formi CxAI — **Bengaluru, India**
AI Research & Data Engineering Intern — *Jun 2022 – Mar 2023*

- Built Python and SQL ETL pipelines processing **1M+ data points** for distributed AI workflows.
- Profiled GPU utilization and optimized inference workloads, improving throughput by **20%**.
- Supported predictive model deployment and reproducible ML workflows, improving model accuracy by **15%**.

CloudFuze Inc — **Cary, NC**
Technology Intern — *Oct 2021 – Mar 2022*

- Engineered API-based ETL workflows integrating structured and unstructured data into a scalable analytics platform.
- Designed anomaly-detection workflows that improved data compliance and platform reliability by **30%**.
- Optimized SQL and data workflows to reduce reporting latency and prepare ML-ready datasets.

Projects

AbDiffuser – Generative Antibody Design — **PyTorch, CUDA, AWS**

- Researched diffusion models and transformers for biomolecular sequence generation on multi-GPU clusters.
- Built parallel training pipelines with experiment logging, checkpointing, and reproducibility controls, achieving a **10x increase in training throughput**.

Greek Shield – AI-Driven Options Risk Analytics — **Snowflake, Python, AWS S3, Cortex AI, Streamlit**

- Built an end-to-end ELT pipeline ingesting AAPL options data from Yahoo Finance into a six-layer Snowflake architecture.
- Implemented Black–Scholes Greeks using Snowflake UDFs and aggregated portfolio-level metrics for automated risk monitoring.
- Developed a four-agent AI workflow using Cortex and GPT-based reasoning to analyze risk, generate explanations, trigger Slack alerts, and surface insights in Streamlit.

Publications

"A Web Based Crop Recommendation System Using Various Machine Learning Algorithms." *Indian Journal of Natural Sciences*, Vol. 13, Issue 76, Feb 2023. (Co-author)

Certifications

Microsoft Certified: Azure AI Fundamentals — Databricks Accredited: Generative AI Fundamentals — Salesforce Certified: AI Associate
